September 1, 2006

Dear AGC Las Vegas Member:

AGC Las Vegas has a new benefit for our members, and I believe it can be specifically useful to you and your company. It is a telecommunications audit program offered by Corporate Advocates for both traditional phone and wireless/cellular service.

While there are plenty of offerings that claim to save you money, this one really can. If they don't identify any savings for your firm, you don't owe them a cent. The Corporate Advocates program is in operation with the Carolinas AGC and several other AGC chapters and members have received refund checks and savings ideas totaling in the tens of thousands of dollars for overcharges they had paid within their monthly bills.

Through this partnership with Corporate Advocates, the program costs you nothing other than a portion of the savings they achieve through the analysis of your cell phone and landline communications services. There are so many different phone provider options that it is virtually impossible for any company to unravel the variances. Our partner has developed a software program to accomplish this for you and it is making big inroads with other AGC chapters throughout the southeast.

Corporate Advocates does not sell a phone system or carrier services. They identify billing errors on your phone bills and negotiate refunds for errors you may not know even exist. The results are truly amazing. The staff is made up of former phone company executives.

I hope you might be interested in taking a look at this benefit. It could provide some serious savings. Please ask your manager of phone contracts to contact Marc Warner at 704.522.6551 or via e-mail at marc.warner@corporate-advocates.com. They are also available at www.corporateadvocates.com. I believe you will be very pleased.

We appreciate your investment in AGC Las Vegas, and hope this member benefit is just another way you see value in belonging to our chapter.

Sincerely,

Steve G. Holloway
Executive Vice President
